

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Currently Amended) A method for displaying pages in a viewer program on a computer display monitor, wherein the viewer program displays an application window, comprising:

downloading a first and second pages from one of multiple servers over a network;
automatically concurrently displaying the first page in a first ~~window~~ pane and the second page in a second ~~window~~ pane in the application window according to predefined settings specifying how pages are to be displayed in the first and second panes;
downloading a third page from one of multiple servers over the network;
automatically concurrently displaying the third page in one of the first and second panes and one of the first and second pages in the other pane according to the predefined settings;
downloading a fourth page from one of multiple servers over the network; [[and]]
automatically concurrently displaying the third and fourth pages in the first and second panes according to the predefined settings ;
receiving user selection of a hypertext link within one of the displayed pages;
accessing the page addressed by the hypertext link;
automatically concurrently displaying the page currently displayed in the second pane in the first pane and displaying the page addressed by the hypertext link in the second pane if the user selected the hypertext link from the second pane;
automatically concurrently displaying the page currently displayed in the first pane and displaying the page addressed by the hypertext link in the second pane if the user selected the hypertext link from the first pane; and

wherein the viewer program is capable of displaying the downloaded pages in the first and second panes according to the predefined settings when the pages downloaded from over the network do not include any page commands to cause the display of pages in separate panes within the application window.

2. (Original) The method of claim 1, wherein the first pane is displayed adjacent and to the left of the second pane, wherein automatically concurrently displaying the third page and one of the first and second pages comprises concurrently displaying the second page in the first pane and the third page in the second pane.

3. (Original) The method of claim 1, further comprising:
caching previously downloaded pages in the order in which they were downloaded from the network;
receiving a user input command to display a previously displayed page; and
automatically concurrently displaying the previously displayed page in the first pane and the first page in the second pane according to the predefined settings in response to the user input command to display the previously displayed page.

4. (Original) The method of claim 3, wherein the first pane is displayed adjacent and to the left of the second pane.

5. (Original) The method of claim 1, further comprising:
caching previously downloaded pages in the order in which they were downloaded from the network;
receiving a user input command to display a subsequent page cached after the first and second pages were downloaded; and

automatically concurrently displaying the subsequent page in the second pane and the second page in the first pane according to predefined settings in response to the user input command to display the previously displayed page.

6. (Cancelled)

7. (Currently Amended) The method of claim [[6]] 1, wherein the first pane is displayed adjacent and to the left of the second pane.

8. (Original) The method of claim 1, further comprising:
receiving user selection of a hypertext link within one of the displayed pages in one of the panes;
accessing the page addressed by the hypertext link; and
automatically concurrently displaying the page addressed by the hypertext link in the pane opposite the pane displaying the page from which the hypertext link was selected the page from which the link was selected in its current pane.

9. (Cancelled)

10. (Currently Amended) A system for displaying pages in a viewer program on a computer display monitor, wherein the viewer program displays an application window, comprising:

means for downloading a first and second pages from one of multiple servers over a network;

means for automatically concurrently displaying the first page in a first ~~window~~ pane and the second page in a second ~~window~~ pane in the application window according to predefined settings specifying how pages are to be displayed in the first and second panes;

means for downloading a third page from one of multiple servers over the network;
means for automatically concurrently displaying the third page in one of the first and second panes and one of the first and second pages in the other pane according to the predefined settings;

means for downloading a fourth page from one of multiple servers over the network;
[[and]]

means for automatically concurrently displaying the third and fourth pages in the first and second panes according to the predefined settings ;

means for receiving user selection of a hypertext link within one of the displayed pages;

means for accessing the page addressed by the hypertext link;

means for automatically concurrently displaying the page currently displayed in the second pane in the first pane and displaying the page addressed by the hypertext link in the second pane if the user selected the hypertext link from the second pane;

means for automatically concurrently displaying the page currently displayed in the first pane and displaying the page addressed by the hypertext link in the second pane if the user selected the hypertext link from the first pane; and

wherein the means for displaying the downloaded pages in the first and second panes according to the predefined settings is capable of displaying the pages in the first and second panes when the pages downloaded from over the network do not include any page commands to cause the display of pages in separate panes within the application window.

11. (Original) The system of claim 10, wherein the first pane is displayed adjacent and to the left of the second pane, wherein the means for automatically concurrently displaying the third page and one of the first and second pages concurrently displays the second page in the first pane and the third page in the second pane.

12. (Original) The system of claim 10, further comprising:

means for caching previously downloaded pages in the order in which they were downloaded from the network;

means for receiving a user input command to display a previously displayed page; and

means for automatically concurrently displaying the previously displayed page in the first pane and the first page in the second pane according to the predefined settings in response to the user input command to display the previously displayed page.

13. (Original) The system of claim 12, wherein the first pane is displayed adjacent and to the left of the second pane.

14. (Original) The system of claim 10, further comprising:

means for caching previously downloaded pages in the order in which they were downloaded from the network;

means for receiving a user input command to display a subsequent page cached after the first and second pages were downloaded; and

means for automatically concurrently displaying the subsequent page in the second pane and the second page in the first pane according to predefined settings in response to the user input command to display the previously displayed page.

15. (Cancelled)

16. (Currently Amended) The system of claim ~~[[15]]~~ 10, wherein the first pane is displayed adjacent and to the left of the second pane.

17. (Original) The system of claim 10, further comprising:

means for receiving user selection of a hypertext link within one of the displayed pages in one of the panes;

means for accessing the page addressed by the hypertext link; and
means for automatically concurrently displaying the page addressed by the hypertext link in the pane opposite the pane displaying the page from which the hypertext link was selected the page from which the link was selected in its current pane.

18. (Cancelled)

19. (Currently Amended) An article of manufacture for use in displaying electronic pages in a viewer program application window on a computer display monitor, wherein the article of manufacture comprises at least one computer program that is capable of causing a computer to perform:

downloading a first and second pages from one of multiple servers over a network;
automatically concurrently displaying the first page in a first ~~window~~ pane and the second page in a second ~~window~~ pane in the application window according to predefined settings specifying how pages are to be displayed in the first and second panes;
downloading a third page from one of multiple servers over the network;
automatically concurrently displaying the third page in one of the first and second panes and one of the first and second pages in the other pane according to the predefined settings;
downloading a fourth page from one of multiple servers over the network; [[and]]
automatically concurrently displaying the third and fourth pages in the first and second panes according to the predefined settings ; and
receiving user selection of a hypertext link within one of the displayed pages;
accessing the page addressed by the hypertext link;
automatically concurrently displaying the page currently displayed in the second pane in the first pane and displaying the page addressed by the hypertext link in the second pane if the user selected the hypertext link from the second pane;

automatically concurrently displaying the page currently displayed in the first pane and displaying the page addressed by the hypertext link in the second pane if the user selected the hypertext link from the first pane; and

wherein the viewer program is capable of displaying the downloaded pages in the first and second panes according to the predefined settings when the pages downloaded from over the network do not include any page commands to cause the display of pages in separate panes within the application window.

20. (Original) The article of manufacture of claim 19, wherein the first pane is displayed adjacent and to the left of the second pane, wherein automatically concurrently displaying the third page and one of the first and second pages comprises concurrently displaying the second page in the first pane and the third page in the second pane.

21. (Original) The article of manufacture of claim 19, further comprising:
caching previously downloaded pages in the order in which they were downloaded from the network;
receiving a user input command to display a previously displayed page; and
automatically concurrently displaying the previously displayed page in the first pane and the first page in the second pane according to the predefined settings in response to the user input command to display the previously displayed page.

22. (Original) The article of manufacture of claim 21, wherein the first pane is displayed adjacent and to the left of the second pane.

23. (Original) The article of manufacture of claim 19, further comprising:
caching previously downloaded pages in the order in which they were downloaded from the network;

receiving a user input command to display a subsequent page cached after the first and second pages were downloaded; and

automatically concurrently displaying the subsequent page in the second pane and the second page in the first pane according to predefined settings in response to the user input command to display the previously displayed page.

24. (Cancelled)

25. (Currently Amended) The article of manufacture of claim ~~[[24]]~~ 19, wherein the first pane is displayed adjacent and to the left of the second pane.

26. (Original) The article of manufacture of claim 19, further comprising:
receiving user selection of a hypertext link within one of the displayed pages in one of the panes;
accessing the page addressed by the hypertext link; and
automatically concurrently displaying the page addressed by the hypertext link in the pane opposite the pane displaying the page from which the hypertext link was selected the page from which the link was selected in its current pane.

27. (Cancelled)
